### Accident Investigation Part II

#### **The Ways Behind the Accident Investigation**

**Mr Jesse Hau**

#### **How to Write an Accident Report: A Personal View**

**Dr Aron Kwok**

23 January 2010 (Saturday) (9:30 am – 12:30 pm)

Room Y302, The Hong Kong Polytechnic University

---

As many safety practitioners would agree – individual safety practitioners have their personal work style, even all of them are in-line with statutory requirements. This is the same as for doing an accident investigation for an accident at work. The seminar is the second part of the two-session “Accident Investigation” seminar. The speakers will take a personal perspective in exploring the arena of accident investigation. Although there are steps or procedures to follow in performing investigation after an accident, to certain extent, responsible investigators have their own rule-of-thumb in order to facilitate the smooth inquiry into important events.
